

QADIAN — DETAILED 223-BOOTH MASTERPLAN

Booth-level field operations based on the supplied 2022 vs 2024 dataset

Purpose

This is the detailed working version of the booth plan. It replaces confusing priority codes with plain-language status explanations and gives every booth a specific operational action sequence. The actions are for field organisation, public-issue listening, data verification, legitimate follow-up and repeat visits—not individual voter targeting.

How the status works

AAP retained: AAP led in both elections. Maintain organisation and verify the current ground situation.

Flipped to AAP: AAP did not lead in 2022 but led in 2024. Investigate and understand the transition.

AAP flipped away: AAP led in 2022 but another party led in 2024. Diagnose the reversal.

Other party retained: The same non-AAP party led in both elections. Build long-term local organisation and listening.

Other flip: The winning party changed between elections. Verify what changed locally.

Data verification: Confirm the booth/polling status before deployment.

90-day booth cycle

- Days 1–30: assign coordinator/team, build booth profile, attach survey and historical data, prepare route.
- Days 31–45: Round 1 — systematic visit, listen, record, verify and identify follow-up.
- Days 46–60: Follow-up — assign genuine issues to the appropriate authority/stakeholder and record progress.
- Days 61–75: Round 2 — return, check what changed and update the booth profile.
- Days 76–85: Repair — fix inactive teams, close reporting gaps and revisit unresolved matters.
- Days 86–90: Audit — confirm coverage, team status, open issues, last visit and next action.

Detailed booth-by-booth plan

Every row below is generated from the supplied booth dataset. The historical numbers are analytical inputs; the action column is the field-management plan.

Booth	Village	2022 winner	2022 AAP	2024 winner	2024 AAP	AAP swing	Turnout Δ	Detailed status	Detailed action
1	Jogewal Jattan	INC	35.01%	AAP	53.86%	+18.85 pts	-5.96%	AAP won in 2024 after INC led in 2022. Treat as a transition booth. The field task is to establish what changed locally and whether the current ground situation supports that change.	1. Conduct Round-1 visit. 2. Compare 2022/2024 movement (AAP swing +18.85 pts; turnout - 5.96%). 3. Ask what changed locally. 4. Check turnout, election context, local developments and organisation. 5. Record current public issues. 6.

									Verify important findings. 7. Return in Round 2. 8. Update booth file.
2	Chhotepur	AAP	50.00%	AAP	44.66%	-5.34 pts	-0.64%	AAP won in both 2022 and 2024. Treat as a continuity booth: maintain organisation, verify current issues and do not assume the historical result will automatically repeat.	1. Keep a permanent coordinator. 2. Complete a structured listening visit. 3. Review 2022/2024 numbers (AAP swing - 5.34 pts; turnout - 0.64%). 4. Record current area-level issues. 5. Check team activity. 6. Schedule a return visit. 7. Keep on monthly maintenance.
3	Allowal	INC	34.52%	AAP	41.88%	+7.36 pts	-11.09%	AAP won in 2024 after INC led in 2022. Treat as a transition booth. The field task is to establish what changed locally and whether the current ground situation supports that change.	1. Conduct Round-1 visit. 2. Compare 2022/2024 movement (AAP swing +7.36 pts; turnout - 11.09%). 3. Ask what changed locally. 4. Check turnout, election context, local developments and organisation. 5. Record current public issues. 6. Verify important findings. 7. Return in Round 2. 8. Update booth file.
4	Allowal	INC	25.98%	AAP	45.09%	+19.11 pts	-13.32%	AAP won in 2024 after INC led in 2022. Treat as a transition booth. The field task is to establish what changed locally and whether the current	1. Conduct Round-1 visit. 2. Compare 2022/2024 movement (AAP swing +19.11 pts; turnout - 13.32%). 3. Ask what changed locally. 4. Check turnout,

								ground situation supports that change.	election context, local developments and organisation. 5. Record current public issues. 6. Verify important findings. 7. Return in Round 2. 8. Update booth file.
5	Kot Santokh Rai	AAP	40.16%	AAP	35.99%	-4.17 pts	-5.76%	AAP won in both 2022 and 2024. Treat as a continuity booth: maintain organisation, verify current issues and do not assume the historical result will automatically repeat.	1. Keep a permanent coordinator. 2. Complete a structured listening visit. 3. Review 2022/2024 numbers (AAP swing - 4.17 pts; turnout - 5.76%). 4. Record current area-level issues. 5. Check team activity. 6. Schedule a return visit. 7. Keep on monthly maintenance.
6	Kot Santokh Rai	SAD	33.90%	INC	33.27%	-0.63 pts	-13.00%	The winning party changed from SAD in 2022 to INC in 2024. Treat as a transition booth and verify the local causes.	1. Conduct diagnostic visit. 2. Compare 2022/2024 movement (AAP swing - 0.63 pts; turnout - 13.00%). 3. Establish what changed. 4. Check organisation, election context and current issues. 5. Verify observations. 6. Assign follow-up. 7. Return in Round 2. 8. Update the database.
7	Kheh Tikha + Chakk Gharoye	SAD	31.40%	INC	27.32%	-4.08 pts	-6.85%	The winning party changed from SAD in 2022 to INC in 2024. Treat as a transition	1. Conduct diagnostic visit. 2. Compare 2022/2024 movement (AAP swing - 4.08 pts;

								booth and verify the local causes.	turnout - 6.85%). 3. Establish what changed. 4. Check organisation, election context and current issues. 5. Verify observations. 6. Assign follow-up. 7. Return in Round 2. 8. Update the database.
8	Chakk Deepewal + Devidaspur	INC	23.71%	INC	24.91%	+1.20 pts	-13.87%	INC led in both elections. Treat as a long-term listening and organisation area; historical voting should not be treated as a forecast.	1. Assign permanent coordinator. 2. Conduct structured listening visits. 3. Map recurring public issues. 4. Maintain a reliable local team. 5. Review historical data as context only. 6. Revisit regularly. 7. Escalate organisational gaps.
9	Bal	INC	33.11%	INC	26.34%	-6.77 pts	-2.04%	INC led in both elections. Treat as a long-term listening and organisation area; historical voting should not be treated as a forecast.	1. Assign permanent coordinator. 2. Conduct structured listening visits. 3. Map recurring public issues. 4. Maintain a reliable local team. 5. Review historical data as context only. 6. Revisit regularly. 7. Escalate organisational gaps.
10	Bal	INC	35.34%	AAP	40.75%	+5.41 pts	-13.27%	AAP won in 2024 after INC led in 2022. Treat as a transition booth. The field task is to establish what changed locally and	1. Conduct Round-1 visit. 2. Compare 2022/2024 movement (AAP swing +5.41 pts; turnout - 13.27%). 3. Ask what changed locally. 4.

								whether the current ground situation supports that change.	Check turnout, election context, local developments and organisation. 5. Record current public issues. 6. Verify important findings. 7. Return in Round 2. 8. Update booth file.
11	Sanghar	INC	19.73%	INC	17.78%	-1.95 pts	-1.37%	INC led in both elections. Treat as a long-term listening and organisation area; historical voting should not be treated as a forecast.	1. Assign permanent coordinator. 2. Conduct structured listening visits. 3. Map recurring public issues. 4. Maintain a reliable local team. 5. Review historical data as context only. 6. Revisit regularly. 7. Escalate organisational gaps.
12	Akhlaspur	INC	36.36%	INC	23.72%	-12.64 pts	-2.15%	INC led in both elections. Treat as a long-term listening and organisation area; historical voting should not be treated as a forecast.	1. Assign permanent coordinator. 2. Conduct structured listening visits. 3. Map recurring public issues. 4. Maintain a reliable local team. 5. Review historical data as context only. 6. Revisit regularly. 7. Escalate organisational gaps.
13	Singhpura	AAP	44.85%	AAP	32.45%	-12.40 pts	-4.28%	AAP won in both 2022 and 2024. Treat as a continuity booth: maintain organisation, verify current issues and do not assume the historical result will	1. Keep a permanent coordinator. 2. Complete a structured listening visit. 3. Review 2022/2024 numbers (AAP swing - 12.40 pts; turnout - 4.28%). 4. Record

								automatically repeat.	current area-level issues. 5. Check team activity. 6. Schedule a return visit. 7. Keep on monthly maintenance.
14	Badesh	AAP	41.34%	INC	25.83%	-15.51 pts	-7.74%	AAP won in 2022 but INC led in 2024. Treat as a reversal booth. The first task is diagnosis: what changed between the elections, and what is the current local situation?	1. Put on immediate diagnosis list. 2. Compare 2022/2024 movement (AAP swing - 15.51 pts; turnout - 7.74%). 3. Conduct detailed listening visit. 4. Find out what changed before 2024. 5. Check local organisation and activity. 6. Record issues without assuming they caused the result. 7. Assign legitimate follow-up. 8. Return and update.
15	Sandhwan	AAP	54.09%	AAP	40.38%	-13.71 pts	-3.18%	AAP won in both 2022 and 2024. Treat as a continuity booth: maintain organisation, verify current issues and do not assume the historical result will automatically repeat.	1. Keep a permanent coordinator. 2. Complete a structured listening visit. 3. Review 2022/2024 numbers (AAP swing - 13.71 pts; turnout - 3.18%). 4. Record current area-level issues. 5. Check team activity. 6. Schedule a return visit. 7. Keep on monthly maintenance.
16	Kalyanpur	SAD	21.24%	INC	26.94%	+5.70 pts	-9.36%	The winning party changed from SAD in 2022 to INC in 2024. Treat as a transition booth and verify the	1. Conduct diagnostic visit. 2. Compare 2022/2024 movement (AAP swing +5.70 pts; turnout - 9.36%). 3.

								local causes.	Establish what changed. 4. Check organisation, election context and current issues. 5. Verify observations. 6. Assign follow-up. 7. Return in Round 2. 8. Update the database.
17	Kalyanpur	SAD	29.99%	INC	24.03%	-5.96 pts	+1.63%	The winning party changed from SAD in 2022 to INC in 2024. Treat as a transition booth and verify the local causes.	1. Conduct diagnostic visit. 2. Compare 2022/2024 movement (AAP swing - 5.96 pts; turnout +1.63%). 3. Establish what changed. 4. Check organisation, election context and current issues. 5. Verify observations. 6. Assign follow-up. 7. Return in Round 2. 8. Update the database.
18	Gurdas Nangal + Badiyawala	INC	24.81%	INC	39.03%	+14.22 pts	-14.33%	INC led in both elections. Treat as a long-term listening and organisation area; historical voting should not be treated as a forecast.	1. Assign permanent coordinator. 2. Conduct structured listening visits. 3. Map recurring public issues. 4. Maintain a reliable local team. 5. Review historical data as context only. 6. Revisit regularly. 7. Escalate organisational gaps.
19	Gurdas Nangal + Badiyawala	AAP	35.64%	INC	34.91%	-0.73 pts	-16.34%	AAP won in 2022 but INC led in 2024. Treat as a reversal booth. The first task is diagnosis:	1. Put on immediate diagnosis list. 2. Compare 2022/2024 movement (AAP swing - 0.73 pts;

								what changed between the elections, and what is the current local situation?	turnout - 16.34%). 3. Conduct detailed listening visit. 4. Find out what changed before 2024. 5. Check local organisation and activity. 6. Record issues without assuming they caused the result. 7. Assign legitimate follow-up. 8. Return and update.
20	Gurdas Nangal + Badiyawala	AAP	53.27%	INC	34.54%	-18.73 pts	-18.63%	AAP won in 2022 but INC led in 2024. Treat as a reversal booth. The first task is diagnosis: what changed between the elections, and what is the current local situation?	1. Put on immediate diagnosis list. 2. Compare 2022/2024 movement (AAP swing - 18.73 pts; turnout - 18.63%). 3. Conduct detailed listening visit. 4. Find out what changed before 2024. 5. Check local organisation and activity. 6. Record issues without assuming they caused the result. 7. Assign legitimate follow-up. 8. Return and update.
21	Japuwal	INC	27.82%	INC	23.21%	-4.61 pts	-8.40%	INC led in both elections. Treat as a long-term listening and organisation area; historical voting should not be treated as a forecast.	1. Assign permanent coordinator. 2. Conduct structured listening visits. 3. Map recurring public issues. 4. Maintain a reliable local team. 5. Review historical data as context only. 6. Revisit regularly. 7. Escalate

									organisational gaps.
22	Dhariwal	INC	28.05%	AAP	55.35%	+27.30 pts	-7.37%	AAP won in 2024 after INC led in 2022. Treat as a transition booth. The field task is to establish what changed locally and whether the current ground situation supports that change.	1. Conduct Round-1 visit. 2. Compare 2022/2024 movement (AAP swing +27.30 pts; turnout - 7.37%). 3. Ask what changed locally. 4. Check turnout, election context, local developments and organisation. 5. Record current public issues. 6. Verify important findings. 7. Return in Round 2. 8. Update booth file.
23	Sohal	AAP	46.61%	INC	23.31%	-23.30 pts	-13.79%	AAP won in 2022 but INC led in 2024. Treat as a reversal booth. The first task is diagnosis: what changed between the elections, and what is the current local situation?	1. Put on immediate diagnosis list. 2. Compare 2022/2024 movement (AAP swing - 23.30 pts; turnout - 13.79%). 3. Conduct detailed listening visit. 4. Find out what changed before 2024. 5. Check local organisation and activity. 6. Record issues without assuming they caused the result. 7. Assign legitimate follow-up. 8. Return and update.

Booth visit checklist

- Before visit: review previous report, survey information, historical results and open issues.
- During visit: listen to residents/local stakeholders; record current issues accurately; verify important claims.
- After visit: enter findings within 24 hours; assign follow-up; schedule return visit.
- Second visit: check the status of previously recorded matters and update the booth profile.
- Team review: mark organisation Green / Yellow / Red and explain why.
- Candidate visit: use Mahal's time where a direct listening/follow-up visit adds genuine value; never promise powers he does not possess.

Daily command-centre report

- Booths visited
- Villages/areas covered
- Teams deployed
- Issues recorded
- Issues verified
- Follow-ups completed
- Second visits completed
- Booths with no functioning team
- Reports missing
- Tomorrow's deployment

Weekly review

- Coverage — which booths were covered/missed?
- Organisation — which teams are active?
- Issues — what is recurring?
- Follow-up — what actually progressed?
- Data — where does survey differ from field observations?
- Historical analysis — what changed between 2022 and 2024 and what remains uncertain?
- Next week — which booths require another visit or organisational repair?

Important analytical note

The source compares a 2022 Assembly election with the 2024 Lok Sabha election. These are different elections with different candidates, political environments and turnout. Therefore, 2024 booth performance is a useful historical signal but should not be treated as a direct forecast of a future Assembly election.

Final rule

No booth is considered finished after one visit. The working loop is: DATA → TEAM → VISIT → LISTEN → VERIFY → FOLLOW-UP → RETURN → REPORT → REVIEW.
